

Long-Term Educational Proposal

[Capital & Organizational]

*“ Maximizing Learning Opportunities
in Schools in Western Newfoundland
and Southern Labrador”*

April 2006

This document is prepared by the Senior Administrative Staff of the Western School District and presented to the Board of Trustees of the Western School District.

The Western School District extends from Norman Bay, Labrador, to the Quebec border in L'Anse aux Claire, and from St. Anthony to Port aux Basques and Francois.

The Western School District has a Central Office in Corner Brook, two Regional Offices in Lower Cove and Stephenville, 80 schools, more than 14,000 students, and nearly 1700 employees.

The Western School District is committed to student learning, organizational learning, and the acquisition and wise use of resources.

SUMMARY

Recommended New Schools/Redevelopments	
Port Hope Simpson	New school construction
L'Anse au Loup	New school construction
St. Anthony	School redevelopment
Roddickton	School redevelopment
Flower's Cove	School redevelopment
Port Saunders	New school construction
Bonne Bay South	New school construction and/or redevelopment
Pasadena	School redevelopment and/or construction
Corner Brook	New school construction and/or redevelopment
Port au Port Peninsula	School redevelopment and construction

SUMMARY

Possible School Closures	
Pinsent's Arm School, Pinsent's Arm	June 2006
St. James School, Lodge Bay	June 2006
Our Lady of Labrador School, West Ste. Modeste	Upon establishment of K-12 school, L'Anse au Loup
St. Paul's Elementary, L'Anse au Loup	Upon establishment of K-12 school, L'Anse au Loup
Mountain Feild Academy, Forteau	Upon establishment of K-12 school, L'Anse au Loup
Straits Elementary, Flower's Cove	Upon redevelopment and possible extension of Canon Richards High
Torrent River Academy, Hawke's Bay	Upon establishment of K-12 school, Port Saunders
St. Theresa's Elementary, Port aux Choix	Upon establishment of K-12 school, Port Saunders
Roncalli High School, Port Saunders	Upon establishment of K-12 school, Port Saunders
St. Michael's Elementary, Rose Blanche	June 2006
Other possible closures may be identified following further exploration/consultation as outlined in this document.	

Introduction

In 1996, the Province of Newfoundland and Labrador implemented a reorganization of school districts, which reduced the number of anglophone school districts from 27 to 10. Three districts were created in the western region of the province: Northern Peninsula/Southern Labrador (District 2), Deer Lake-Corner Brook-St. Barbe (District 3), and Cormack Trail (District 4). In September 2004, government further reduced the number of anglophone school districts in the province to four. The Western School District was formed with the amalgamation of the former Districts 2, 3 and 4.

The **Western School District** extends from Norman Bay, Labrador, to the Quebec border in L'Anse au Claire, and from St. Anthony to Port aux Basques and Francois.

The **Western School District** is committed to a focus on student learning, organizational learning, and the acquisition and wise use of resources. Therefore, the district must continually evaluate and assess how it is serving the needs of students to ensure that all students are provided with a wide range of educational experiences within an educationally enhancing environment. The district must, on a regular and periodic basis, assess its schools to ensure that education is delivered in the most enhancing physical environment. The district must determine if the configurations of schools are the best possible to serve the needs of the students. This process dictates that decisions be made as to whether a school continues to operate, whether a school should be reconfigured, whether a school needs substantial capital improvements, or whether new buildings should be constructed.

There are several significant contexts to this long-term capital proposal. First, many students at various locations throughout the Western School District go to school in buildings that need major improvements or replacement (See Appendix: *Long-Term Educational Proposal: Detailed School Descriptions*). Second, the Province of Newfoundland and Labrador has indicated a commitment to addressing infrastructure needs in the Province, including needs in K-12 education. The Western School District is committed to the provision of state-of-the art facilities for all students in our care.

Context of the Long-Term Proposal

- Student Need
- Government Commitment to Infrastructure
- District Commitment to Provision of Excellent Facilities

This document presents a multi-year long-term proposal for schooling in the district. Government commitment to infrastructure, declining school enrolment, and facility deterioration have had major impact on the recommendations in this report. The report looks at reconfiguration of school systems, school closures, new school construction and major school redevelopment as possible ways of optimizing educational opportunities for the students in the district.

Two basic goals govern a long-term capital planning process:

- 1. Maximizing learning opportunities for all students.**
- 2. The provision of excellent facilities for all students.**

These goals are achieved by in-depth analysis of:

- Program offerings.**
- Student enrolment patterns.**
- The condition of present facilities.**
- Transportation requirements.**
- Existing and projected Resource Allocations.**

Our Schools

The **Western School District** has 80 schools of varying sizes. The smallest school has 2 students and the largest has 615 students.

Table 1

**Western School District
Schools - Sorted by Enrolment**

Size	<25	25-49	50-99	100-149	150-199	200-249	250-299	300-349	350-399	400-449	>449
#	11	7	17	7	6	10	7	1	6	4	4

The types of grade configurations in the schools within **Western School District** also vary greatly. Kindergarten to Level III and Kindergarten to Grade 6 schools account for over half of the schools.

School Facilities and Condition

The physical condition of schools within the **Western School District** varies from school to school. Some of the schools are older, built in the 1950s, and in need of redevelopment or replacement. There are other schools that have had substantial work carried out in recent years. There are also a number of relatively new schools. A detailed analysis of each school is provided in the appendix. (See Appendix: *Long-Term Educational Proposal: Detailed School Descriptions*).

The Government of Newfoundland and Labrador, through the Department of Education, has embarked upon an ambitious infrastructure program which will see the infusion of substantial capital funding over the next few years. The **Western School District** has a number of schools which are in need of major renovations and/or redevelopments or in need of replacement. This long-term proposal is committed to accessing some of this funding in an effort to ensure that our physical facilities are improved in a manner that provides our students with the very best learning experiences.

The school board acknowledges the importance of cooperative ventures within its facilities and presently works with various agencies in the provision of programs. The board is committed to continued cooperation with these social, educational and community agencies into the future. As the school board restructures its schools and possibly closes some schools, there may be opportunities for further and enhanced cooperative arrangements. There may also be opportunities for other government agencies to use buildings closed by the school board or to use excess space within present buildings.

Population and Enrolment Changes

Newfoundland and Labrador experienced population growth from 1971 to 1984, when its population was at its highest at 580,181. Since then, the province's population has declined to 515,961 in 2005. The population loss from 1984 to 2005 was 11.1 %.

There has been an even greater decline in population for school age children, the 5-19 year age group. In 1984, this segment of the population was 171,416. Since 1984, there has been continuous decline, such that the population of 5-19 year olds in 2005 was 91,941 (a loss of 79,475 people) - a 52.7 % decrease. In the 0-4 year group, the population in 1984 was 46,286. The population of this group in 2005 was 23,538 (a loss of 22,748 people) - a 49.2 % decrease. (See *Table 5* below, entitled *Population by Age Group, Newfoundland and Labrador*).

Table 5: Population by Age Group, Newfoundland & Labrador			
	1984	2005	Percentage Decline
Total Population, NL	580,181	515,961	11.1%
Age 5-19, NL	171,416	91,941	52.7%
Ages 0-4, NL	46,286	23,538	49.2%

School enrolment in Newfoundland and Labrador was at its highest number in the 1971-72 school year with 162,818 students. The student population for the 2005-06 school year was 77,876, a loss of 84,942 students or 52.2 %. Kindergarten enrolment in 1971-72 was 12,887 students. In 2005-06, the Kindergarten enrolment had decreased to 5049, a loss of 7838 or 60.8 %. Birth statistics for 2001-2005 show a continued decrease in the population at the 0-4 age group indicating that Kindergarten enrolments are likely to continue decreasing. (See Table 6 below, entitled *Student Enrolment, Newfoundland and Labrador*).

TABLE 6: Student Enrolment, Newfoundland & Labrador			
	1971-72	2005-06	Percentage Decline
Total Student Enrolment	162,818	77,876	52.2%
Kindergarten Enrolment	12,882	5,049	60.8%

In the **Western School District**, enrolment decline has been even greater than the provincial average. Since 1996, the province has seen a decline in enrolment of 26.7 % while in the **Western School District**, the decline has been 32.2 %. Within the district, the decline has not been consistent in all three zones. Since 1996, the southern zone (formerly District 4) experienced a 37.2 % decline in enrolment, the northern zone (formerly District 2) experienced a 36.7 % decline in enrolment and the central zone (formerly District 3) experienced a 26.3 % decline in enrolment. (See Table 7, entitled *Western School District, District Enrolment over Time - Segregated by Zone*, p. 10).

One of the major factors causing the decline in population is low birth rates as identified in provincial population statistics. Whereas Newfoundland and Labrador once had the highest birth rate in the country, it now has the lowest. This has been coupled with out-migration and low immigration rates.

Table 7: Western School District

Educational Programming

As enrolments decline, provision of a wide range of educational opportunities becomes more difficult. This is especially true for high school programming. Even with distance learning through CDLI, schools with small high school enrolments find it extremely difficult to provide even core programming.

As enrolments decrease at the K-9 level, multi-aging or multi-grading become a necessity and not a matter of choice. Even though multi-aging practices are accepted as a positive method of delivery in the hands of trained teachers who embrace the concept, many schools, teachers, and parents prefer a single-grade concept.

When enrolments at a grade level decrease to the point where there are only a few students, the social implications must also be considered. Opportunities for a wide range of interactions with different children are decreased in very small schools. This is a particularly relevant factor because so much of the curriculum, particularly at the primary level, is focused around group activities and team learning. In areas too distant from other areas to contemplate consolidation, solutions to these educational and social difficulties cannot be found in school reorganization or consolidation. But, when a very small school exists in an area in which the students have access to a nearby school, these consolidations should be seriously explored.

Bursary Programs

Some schools are located in communities too distant from neighboring communities to contemplate amalgamation. As enrolments at the high school level decline in these schools, provision of high school programming becomes increasingly difficulty. Students may avail of high school programming in another community through a government-sponsored bursary program. This is presently occurring in a number of our schools and may need to be explored in other areas.

The Western School District will make representation to the Department of Education for more flexible and generous arrangements around the bursary program in order to broaden educational opportunities to students.

The Process

This document recommends the processes to be followed in each area of the district in order to include parent and community input in the upcoming decisions of the Board. In some cases, the document recommends a notice of motion for the possible closure of a school. It is important to understand what this means and the process of consultation which follows from it. The motion means that the board is giving the school community notice that it will consider a school closure only after a thorough consultation has taken place. The Board will inform the school community that a notice of motion has been passed and it will provide a period of time (not less than 30 days) during which parents and the school community are invited to express their views to the Board in person or in writing. This period also includes a public meeting at which presentations from any interested persons or groups are invited. Following this process, the Board will consider all of the information

and views presented, and all associated documents, and may then decide to keep a school open or to close it at some specified date.

Other processes involving study and exploratory meetings are also outlined in this document. As well, a very important part of the process involves representation to government for capital funding to improve or replace schools in the Western School District.

Area 1: *Raymond Ward Memorial School, Norman Bay
Pinsent's Arm School, Pinsent's Arm
William Gillett Academy, Charlottetown*

Raymond Ward Memorial School, the most northerly school in the district, is located in the community of Norman Bay. Norman Bay is a small, isolated community and is inaccessible by road. The school offers K-Level II programming to 14 students, with Level III students completing high school through a bursary program at William Gillett Academy. The school building is in very good physical condition and requires no major renovations or refurbishing. It is projected to have fourteen students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have ten students.

Pinsent's Arm School presently offers programming to three students in Grades 1, 3 and 8. Some elementary and high school students are currently bused from Pinsent's Arm to William Gillett Academy in Charlottetown. The building is in good physical condition and requires no capital expenditures. Pinsent's Arm is 23 kilometres from Charlottetown. It is projected to have three students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 1 student.

William Gillett Academy offers a K-Level III program to 84 students in Charlottetown, bursary Level III students from Norman Bay, and some elementary and high school students in Pinsent's Arm. The building is in fairly good physical condition but requires a new gymnasium floor and a new cafeteria. It is projected to have 78 students in the 2006-07 school year, or 81 students if Pinsent's Arm School is closed. By the 2010-11 school year, it is projected to have 80 students or 81 students if Pinsent's Arm School is closed.

Recommendations	
Raymond Ward Memorial, Norman Bay	<ul style="list-style-type: none"> • Status Quo • No major capital work
Pinsent's Arm School, Pinsent's Arm	<ul style="list-style-type: none"> • Possible closure in June 2006, students relocated to William Gillett Academy.
William Gillett Academy, Charlottetown	<ul style="list-style-type: none"> • Status Quo • Secure funds from government for new gymnasium floor and cafeteria.

Motion 1: *The Board hereby gives notice of motion for possible closure of Pinsent's Arm School effective June 30, 2006.*

**Area 2: Williams Harbour School, Williams Harbour
D. C. Young School, Port Hope Simpson**

Williams Harbour School is located in Williams Harbour, which is a small isolated community not accessible by road. The school offers K-9 programming to five students with high school students completing high school through a bursary program at D. C. Young School. The school building is in good physical condition and will have new windows and roof shingles installed in the summer of 2006. Otherwise, it requires no renovations or refurbishing. It is projected to have five students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have five students.

D. C. Young School is located in Port Hope Simpson which is 50 kilometres from Charlottetown, 52 kilometres from St. Lewis, 53 kilometres from Mary’s Harbour, and 58 kilometres from Lodge Bay. The school offers K-Level III programming to 99 students from Port Hope Simpson, as well as bursary students from Williams Harbour. The school building is in poor physical condition and requires replacement. It is projected to have 102 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 88 students.

Recommendations	
Williams Harbour School, Williams Harbour	<ul style="list-style-type: none"> • Status Quo • No major capital work
D. C. Young School, Port Hope Simpson	<ul style="list-style-type: none"> • Secure funds from government to construct a new K-Level III school

Motion 2: The Board requests funding from government for the construction of a new K-Level III school in Port Hope Simpson.

Area 3: St. Lewis All-Grade, St. Lewis

St. Lewis All-Grade is located in St. Lewis, which is 52 kilometres from Port Hope Simpson and 61 kilometres from Mary's Harbour. The school offers K-Level III programming to 51 students from St. Lewis. The school building is in good physical condition but will require roof repairs in the next few years. It is projected to have 50 students in the 2006-07 school year and 41 students in the 2010-11 school year.

Recommendations	
St. Lewis All-Grade, St. Lewis	<ul style="list-style-type: none">• Status Quo• Minor roof repairs required.

**Area 4: St. Mary's All-Grade, Mary's Harbour
St. James School, Lodge Bay**

St. Mary's All-Grade is located in Mary's Harbour which is 53 kilometres from Port Hope Simpson and 9 kilometres from Lodge Bay. The school offers K-Level III programming to 85 students from Mary's Harbour and high school students bused from Lodge Bay. The school building is in good physical condition but requires construction of a cafeteria, window and entrance repairs, as well as some interior reconfiguring of space. It is projected to have 82 students in the 2006-07 school year, or 98 students if St. James School is closed. By the 2010-11 school year, it is projected to have 76 students or 87 students if St. James School is closed.

St. James School is located in Lodge Bay, which is 9 kilometres from Mary's Harbour. The school offers K-9 programming to 16 students, with high school students bused to Mary's Harbour for completion of high school at **St. Mary's All-Grade**. The school building is in poor physical condition and would need to be replaced if it remains open. It is projected to have 16 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 11 students.

Recommendations	
St. Mary's All-Grade, Mary's Harbour	<ul style="list-style-type: none"> • Status Quo • Secure funds from government to provide a cafeteria and a challenging needs room.
St. James School, Lodge Bay	<ul style="list-style-type: none"> • Possible closure in June 2006, students relocated to St. Mary's All-Grade.

Motion 3: The Board hereby gives notice of motion for possible closure of St. James School, Lodge Bay, effective June 30, 2006.

Note: With the construction of a new K-Level III school in Port Hope Simpson, with continued improvements in the road system and its maintenance, and with the low high school enrolments in **St. Mary's All-Grade, St. Lewis Academy** and **William Gillett Academy**, at some point in the future parents in these areas may wish to explore the possibility of their children attending the Port Hope Simpson facility, or some other facility for their high school program, either through busing or through a bursary program. The new K-Level III facility at Port Hope Simpson could become the education centre for that area of the district. However, any such eventuality would require careful consideration and consultation with parents.

Area 5: Basque Memorial, Red Bay

Basque Memorial is located in Red Bay, which is 48 kilometres from West Ste. Modeste and 60 kilometres from L'Anse au Loup. The school offers K-Level III programming to 32 students from Red Bay. The school building is in excellent physical condition. It is projected to have 32 students in the 2006-07 school year and 24 students in the 2010-11 school year. In the past, some high school students have availed of bursary programs, and this may be a continued possibility in the future.

Recommendations	
Basque Memorial, Red Bay	<ul style="list-style-type: none">• Status Quo

**Area 6: *Our Lady of Labrador School, West Ste. Modeste
St. Paul's Elementary, L'Anse au Loup
Mountain Feild Academy, Forteau***

The three schools in this area serve the students in the Labrador Straits area from L'Anse au Clair to Pinware. Consistent with the motion (following consultation) of the Northern Peninsula School Board in 1999, the Western School District has submitted a funding request to government for the construction of a new K-Level III facility to be located in L'Anse au Loup. The combined enrolment for the 2006-07 school year is projected to be 285 students and, by the 2010-11 school year, it is projected to be 215 students.

Our Lady of Labrador School is located in the community of West Ste. Modeste. The school offers K-Level III programming to 67 students. The building is in poor physical condition. It is projected to have 64 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 40 students.

St. Paul's Elementary is located in the community of L'Anse au Loup. The school offers K-6 programming to 58 students. The school building is in poor physical condition. It is projected to have 52 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 34 students.

Mountain Feild Academy is located in the community of Forteau. The school offers K- Level III programming to 170 students. The building is in good physical condition. It is projected to have 169 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 141 students.

Recommendations	
Our Lady of Labrador School, West Ste. Modeste	<ul style="list-style-type: none"> • Possible closure upon construction of new school.
St. Paul's Elementary, L'Anse au Loup	<ul style="list-style-type: none"> • Possible closure upon construction of new school.
Mountain Feild Academy, Forteau	<ul style="list-style-type: none"> • Possible closure upon construction of new school.
	<ul style="list-style-type: none"> • Secure funds from government to construct a new K-Level III school in L'Anse au Loup.

Motion 4: *The Board hereby gives notice of motion for possible closure of Our Lady of Labrador School, West Ste. Modeste, effective upon the establishment of a new K-Level III school in L'Anse au Loup.*

Motion 5: *The Board hereby gives notice of motion for possible closure of St. Paul's Elementary, L'Anse au Loup, effective upon the establishment of a new K-Level III school in L'Anse au Loup.*

Motion 6: *The Board hereby gives notice of motion for possible closure of Mountain Feild Academy, Forteau, effective upon the establishment of a new K-Level III school in L'Anse au Loup.*

Note: While the former School District 2 held public consultations prior to submission of a funding request to construct a new K-Level III school in L'Anse au Loup, these three motions will provide opportunity for further public input into this proposal.

**Area 7: Harriot Curtis Collegiate, St. Anthony
St. Anthony Elementary, St. Anthony**

Harriot Curtis Collegiate is located in the community of St. Anthony and offers Grades 8-Level III programming for the St. Anthony area as well as high school programming for students from Pistolet Bay School in Raleigh. Its 2005-06 enrolment is 243. The building is in fair to poor physical condition and would require major capital expenditure if it is to remain in operation. It is projected to have 238 students in the 2006-07 school year and 180 students in the 2010-11 school year.

St. Anthony Elementary in the community of St. Anthony offers K-7 programming to 258 students. The school building is in excellent physical condition except for the need for roof replacement in one section of the school. It is projected to have 259 students in the 2006-07 school year and 217 students in the 2010-11 school year.

Major redevelopment of **Harriot Curtis Collegiate** is required and the board has requested major funding from government for this purpose. Depending on other public consultations, **Harriot Curtis Collegiate** may become, in the future, a centre for high school students from surrounding areas. The board should also consider requesting a thorough engineering study by the Department of Education regarding the status of the building. Other possible options, including new construction, may also be explored within the context of the study.

Recommendations	
<p>St. Anthony Elementary, St. Anthony Harriot Curtis Collegiate, St. Anthony</p>	<ul style="list-style-type: none"> • Request that the Department of Education conduct a thorough architectural and engineering assessment of Harriot Curtis Collegiate. • Request major capital funding from government to redevelop Harriot Curtis Collegiate.

Motion 7: *The Board requests funding from government for the redevelopment of Harriot Curtis Collegiate.*

Motion 8: *The Board further requests the Department of Education to conduct a thorough architectural and engineering assessment, the results of which would determine whether other options, including new construction, should be considered.*

Area 8: *Bayview Collegiate, St. Lunaire-Griquet
Truman Eddison Memorial, Gunner's Cove
James Cook Memorial, Cook's Harbour
Pistolet Bay School, Raleigh*

Four schools outside St. Anthony serve the remaining 214 students on the northern tip of the Northern Peninsula. The combined enrolment for the 2006-07 school year for these four schools is projected to be 199 students and, by the 2010-11 school year, it is projected to be 140 students.

Bayview Collegiate is located in the community of St. Lunaire-Griquet and offers 7-Level III programming to 93 students from St. Lunaire-Griquet to L'Anse aux Meadows. The building is in fair physical condition and requires major capital expenditure. It is projected to have 88 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 66 students. L'Anse au Meadows, the most distant community served by **Bayview Collegiate**, is 48 kilometres from St. Anthony.

Truman Eddison Memorial in the community of Gunner's Cove offers K-6 programming to 65 students from St. Lunaire-Griquet to L'Anse aux Meadows. The school building is in excellent physical condition and requires no major capital expenditure. It is projected to have 60 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 41 students.

James Cook Memorial is located in the community of Cook's Harbour and offers K-Level III programming to 32 students from Cook's Harbour and surrounding area. The school building is in good physical condition. It is projected to have 29 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 21 students. Cook's Harbour is 51 kilometres from St. Anthony. Boat Harbour, the most distant community served by James Cook Memorial is 61 kilometres from St. Anthony.

Pistolet Bay School is located in the community of Raleigh and offers K-9 programming to 24 students from Raleigh and Ship Cove. The building is in excellent physical condition. It is projected to have 22 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 12 students. Raleigh is 30 kilometres from St. Anthony. Ship Cove, the most distant community served by Pistolet Bay School, is 39 kilometres from St. Anthony. Amalgamation of **Pistolet Bay School** with the St. Anthony school system may warrant consideration by the Board.

Recommendations

<p>Truman Eddison Memorial, Griquet</p> <p>Bayview Collegiate, St. Lunaire</p> <p>James Cook Memorial, Cook's Harbour</p>	<ul style="list-style-type: none">• During the 2006-07 school year, district administrative staff will consult with school councils in the three schools regarding the future of education for students in that area. If, following this consultation, possible change(s) for a school(s) is contemplated, a clear process will be outlined for further consultation with parents and the community.
<p>Pistolet Bay School, Raleigh</p>	<ul style="list-style-type: none">• Prior to June 23, 2006, district administrative staff to consult with the school council of Pistolet Bay School regarding the future of education for students in the area. If, following this consultation, possible change for the school is contemplated, a clear process will be outlined for further consultation with parents and the community.

Area 9: *Cloud River Academy, Roddickton*
 H. G. Fillier Academy, Englee
 St. Joseph’s All-Grade, Croque
 Sacred Heart All-Grade, Conche
 Mary Simms All-Grade, Main Brook

The five schools on the eastern side of the Northern Peninsula serve 367 students spread over a fairly large geographic area. **Cloud River Academy** has an enrolment of 222, while the other four schools have relatively low enrolments.

Cloud River Academy in Roddickton is the largest of the schools in this area. Its enrolment for the 2005-06 school year is 222. It is projected to have an enrolment of 208 students for the 2006-07 school year and, by the 2010-11 school year, it is projected to have 176 students. It provides a K-Level III program for students in Roddickton and Bide Arm, and high school programming to students from H. G. Fillier Academy in Englee. The building is in excellent condition.

H. G. Fillier Academy in Englee provides K-9 programming for 66 students in Englee. It is projected to have an enrolment of 56 students for the 2006-07 school year and, by the 2010-11 school year, it is projected to have 40 students. Englee is 18 kilometres from Roddickton. The building is in fair condition.

Recommendations	
H.G. Fillier Academy, Englee	<ul style="list-style-type: none"> • Prior to June 23, 2006, district administrative staff to consult with the school council of H.G. Fillier regarding the future of education for students in the area. If, following this consultation, possible change for the school is contemplated, a clear process will be outlined for further consultation with parents and the community.
Cloud River Academy, Roddickton	<ul style="list-style-type: none"> • Status Quo • Request funds from government for additions and redevelopment to accommodate the possible transfer of students, pending public consultations, from H. G. Fillier Academy.

Motion 9: *The Board requests funding from government for the redevelopment of Cloud River Academy, pending the results of board processes including consultation with the school communities.*

St. Joseph's All-Grade in Croque provides K-Level III programming to 14 students in Croque and St. Julien's. It is projected to have an enrolment of 11 students for the 2006-07 school year and, by the 2010-11 school year, it is projected to have 10 students. The building is in fair condition. Croque is 27 kilometres from Main Brook and St. Julien's, the most distant community served by St. Joseph's, is 36 kilometres from Main Brook. The road is not in good condition.

Sacred Heart All-Grade in Conche provides K-Level III programming to 32 students in Conche. It is projected to have an enrolment of 29 students for the 2006-07 school year and, by the 2010-11 school year, it is projected to have 18 students. The building is in fair condition. Conche is 27 kilometres from Roddickton. The road is not in good condition.

Mary Simms All-Grade in Main Brook provides K-Level III programming to 33 students in Main Brook. It is projected to have an enrolment of 28 students for the 2006-07 school year and by the 2010-11 school year, it is projected to have 21 students. The building is in excellent condition. Main Brook is 46 kilometres from Roddickton over a paved road.

It would be appropriate for the Board to consult with school councils in each of these areas regarding the future of education for students in the region.

Recommendations	
<p>Sacred Heart All-Grade, Conche Mary Simms All-Grade, Main Brook St. Joseph's All-Grade, Croque</p>	<ul style="list-style-type: none"> • During the 2006-07 school year, district administrative staff will consult with school councils in the three schools regarding the future of education for students in that area. If, following this consultation, possible change(s) for a school(s) is contemplated, a clear process will be outlined for further consultation with parents and the community.

**Area 10: Canon Richards High School, Flower's Cove
Straits Elementary, Flower's Cove**

Two schools serve the 232 students from Anchor Point to Eddies Cove East, **Straits Elementary** and **Canon Richards High**. Both schools are located in Flower's Cove approximately 2 kilometres apart.

Canon Richards High provides 7-Level III programming to 112 students in the area. It has a projected enrolment of 109 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 101 students. The building is the newer of the two buildings in the area and would require major interior reconfiguration and possible extension if it were to accommodate the entire K-Level III population.

Straits Elementary provides K-6 programming to 120 students in the area. It has a projected enrolment of 123 students in the 2006-07 school year and by the 2010-11 school year, it is projected to have 117 students. The school is more than thirty years old, is not in good condition, and would require substantial work if it were to remain open.

Given the continued decline in student population and the relatively poor condition of **Straits Elementary**, it would be educationally sound to consider the consolidation of the two school populations into one school.

Recommendations	
Canon Richards High, Flower's Cove	<ul style="list-style-type: none"> • Reconfigured to a K-Level III complex. • Secure funds from government to perform interior redevelopment and possible extension to accommodate the K-6 population.
Straits Elementary, Flower's Cove	<ul style="list-style-type: none"> • Possible closure upon redevelopment at Canon Richards High School.

Motion 10: *The Board hereby gives notice of motion for possible closure of Straits Elementary, Flower's Cove, pending the interior redevelopment and provision of appropriate space at Canon Richards High School.*

Area 11 Viking Trail Academy, Plum Point

Viking Trail Academy is located in Plum Point. The school offers K-Level III programming to 244 students from Forrester’s Point to Bartlett’s Harbour. The school building is a new building constructed in 2002 and is in excellent physical condition. It is projected to have 217 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 172 students.

Recommendations	
Viking Trail Academy, Plum Point	<ul style="list-style-type: none">• Status Quo

**Area 12: Roncalli High School, Port Saunders
St. Theresa's Elementary, Port aux Choix
Torrent River Academy, Hawkes Bay**

The three schools in this area serve 380 students from Eddies Cove West to River of Ponds. Declining enrolments will see the population in this area decrease to 283 students by the 2010-11 school year.

Roncalli High School is located in Port Saunders and provides 7-Level III programming to 223 students from Eddies Cove West to River of Ponds. The enrolment is projected to be 199 in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 137 students. The building is poorly designed and would be difficult to reconfigure into a quality K-Level III complex.

St. Theresa's Elementary is located in Port aux Choix and provides K-6 programming to 119 students from Eddies Cove West to Port aux Choix. The enrolment is projected to be 117 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 115 students. The building is in excellent condition.

Torrent River Academy is located in Hawkes Bay and provides K-6 programming to 38 students from Hawkes Bay and River of Ponds. The enrolment is projected to be 32 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 31 students. The building is in excellent condition.

If a new school were constructed in Port Saunders, the longest busing distance would be 40 kilometres from River of Ponds.

Recommendations	
Torrent River Academy, Hawkes Bay	<ul style="list-style-type: none"> • Possible closure upon construction of new school.
St. Theresa's Elementary, Port aux Choix	<ul style="list-style-type: none"> • Possible closure upon construction of new school.
Roncalli High School, Port Saunders	<ul style="list-style-type: none"> • Possible closure upon construction of new school.
	<ul style="list-style-type: none"> • Secure funds from government for the construction of a new K-Level III school at Port Saunders.

Motion 11: *The Board requests funding from government for the construction of a new K-Level III school in Port Saunders.*

Motion 12: *The Board hereby gives notice of motion for possible closure of Torrent River Academy, Hawke's Bay, effective upon the establishment of a K-Level III school in Port Saunders.*

Motion 13: *The Board hereby gives notice of motion for possible closure of St. Theresa's Elementary, Port aux Choix, effective upon the establishment of a K-Level III school in Port Saunders.*

Motion 14: *The Board hereby gives notice of motion for possible closure of Roncalli High School, Port Saunders, effective upon the establishment of a K-Level III school in Port Saunders.*

**Area 13 *Holy Cross All-Grade, Daniel’s Harbour*
*Long Range Academy, Cow Head***

The two schools in this area serve 286 students from Bellburns to St. Paul’s. Declining enrolments will see the population in this area decrease to 202 students in the 2010-11 school year.

Holy Cross All-Grade is located in Daniel’s Harbour and provides K-Level III programming to 77 students from Bellburns to Portland Creek. The enrolment is projected to be 60 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 48 students. The building is in good condition. Daniel’s Harbour is 44 kilometres from Cow Head. Bellburns, the most distant community served by **Holy Cross All Grade**, is 55 kilometres from Cow Head.

Long Range Academy is located in Cow Head and provides K-Level III programming to 212 students from Parsons Pond to St. Paul’s. The enrolment is projected to be 204 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 154 students. The building is in good condition.

With declining enrolments in this area, parents may wish to explore the possibility of a new school in a more central location to serve the needs of all the students from Bellburns to St. Paul’s. The exploration of this topic and other possible reorganizations can occur through a consultation process with school councils.

Recommendations	
<p>Holy Cross All-Grade, Daniel’s Harbour</p> <p>Long Range Academy, Cow Head</p>	<ul style="list-style-type: none"> • Not later than the 2007-08 school year, district administrative staff will consult with school councils in the two schools regarding the future of education for students in that area, and the possibility of a new centrally located school to serve all the students in the region. If, following this consultation, possible change(s) for a school(s) is contemplated, a clear process will be outlined for further consultation with parents and the community. • The Western School District will indicate to government its intention to explore educational options in the Bellburns to St. Paul’s region, and request government to reserve long-term capital funds for possible capital expenditure in this region.

Motion 15: *The Western School District will indicate to government its intention to explore educational options in the Bellburns to St. Paul’s region, and request government to reserve long-term capital funds for possible capital expenditure in this region.*

Area 14 Gros Morne Academy, Rocky Harbour

Gros Morne Academy is located in Rocky Harbour and offers K-Level III programming to 259 students from Sally’s Cove to Norris Point. The school building is a newly redeveloped building with redevelopment occurring in 2002. It is in excellent physical condition. It is projected to have 259 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 226 students.

Recommendations	
Gros Morne Academy, Rocky Harbour	<ul style="list-style-type: none">• Status Quo

**Area 15: Bonne Bay Academy, Woody Point
Jakeman All-Grade, Trout River**

Two schools serve the 191 students of the Bonne Bay South region of the district. Both schools are experiencing fairly severe enrolment declines. The distance between the two schools is 18 kilometres which merits consideration for school consolidation. The combined enrolment for the 2006-07 school year is 175 and, by the 2010-11 school year, it is projected to be 134 students. Road conditions and weather patterns are factors which would need to be studied prior to any decisions.

Bonne Bay Academy is located in Woody Point and provides K-Level III programming to 81 students from Glenburnie to Curzon Village. The enrolment is projected to be 75 students in the 2006-07 school year and is projected to decrease to 61 students in the 2010-11 school year. Part of the building, the newer portion, is in good condition but the other, older part, is in poor condition.

Jakeman All-Grade is located in Trout River and provides K-Level III programming to 110 students from that community. The enrolment is projected to be 100 students in the 2006-07 school year and is projected to decrease to 73 students in the 2010-11 school year. The building is in extremely poor condition.

Five options have been put forward for reorganization in this area:

- Retain two K-Level III schools. This would entail the construction of a new school in Trout River and a major redevelopment of Bonne Bay Academy.
- Consolidation of the two school populations into Bonne Bay Academy. This would entail a major redevelopment of Bonne Bay Academy.
- Consolidation of the two school populations into Trout River. This would entail the construction of a new K-Level III facility at Trout River.
- Retain the K-6 portions at both schools and consolidate the 7-Level III students at Bonne Bay Academy. This would entail a major redevelopment of Bonne Bay Academy and construction of a new K-6 school at Trout River.
- Retain the K-6 portion at both schools and consolidate the Grades 7-Level III students at Trout River. This would entail redevelopment/demolition at Bonne Bay Academy and construction of a new K-12 school at Trout River.

Recommendations

**Bonne Bay Academy, Woody Point
Jakeman All-Grade, Trout River**

- **Request major capital funding from government for the Bonne Bay South area.**
- **Request that the Department of Education conduct architectural and engineering studies on the feasibility of the various options presented.**
- **During the 2006-07 school year, district administrative staff to consult with school councils in the two schools regarding the future of education for students in that area. If, following this consultation, possible change(s) for a school(s) is contemplated, a clear process will be outlined for further consultation with parents and the community.**
- **District administrative staff to complete a study relative to travel and road conditions in the area.**

Motion 16: The Board requests funding from government for school construction or redevelopment in the Bonne Bay South area. The Board further requests the Department of Education undertake a thorough architectural and engineering assessment of the various options.

**Area 16: Hampden Academy, Hampden
Main River Academy, Pollard's Point**

Two schools serve the 248 students of the White Bay part of the district. Both schools are experiencing fairly severe enrolment declines.

Hampden Academy is located in Hampden and provides K-Level III programming to 96 students from Bayside to The Beaches. The enrolment is projected to be 93 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 74 students. The building is an older building in fair condition and is in need of some work. Hampden is 53 kilometres from Pollard's Point and 67 kilometres from Deer Lake.

Main River Academy is located in Pollard's Point and provides K-Level III programming to 152 students from Pollard's Point to Jackson's Arm. The enrolment is projected to be 143 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 106 students. The building is a new construction and is in excellent condition. Jackson's Arm, the most distant community served by **Main River Academy**, is 71 kilometres from Hampden.

Recommendations	
Hampden Academy, Hampden	<ul style="list-style-type: none">• Status Quo• Renovations
Main River Academy, Pollard's Point	<ul style="list-style-type: none">• Status Quo

**Area 17: Elwood Elementary, Deer Lake
 Xavier Junior High School, Deer Lake
 Elwood High School, Deer Lake**

Three schools serve the 1085 students of the Deer Lake area of the district. The area is experiencing enrolment decline and is projected to have an enrolment of 887 in the 2010-11 school year.

Elwood Elementary and **Elwood High Schools** are located within the same complex, with the two schools physically linked and sharing some facilities. Both schools are in good physical condition. **Elwood Elementary** provides K-5 programming to 416 students. It is projected to have an enrolment of 405 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 347 students.

Elwood High School provides high school programming to 295 students. It is projected to have an enrolment of 299 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 268 students.

Xavier Junior High School is located in another part of town and is approximately one kilometre from the Elwood Complex. The building is older than the Elwood complex and is in fair physical condition. The building was built in two stages and is not fully wheelchair accessible. The school provides Grades 6-9 programming to 374 students. **Xavier Junior High** is projected to have an enrolment of 365 students in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 272 students.

Recommendations	
<p>Elwood Elementary, Deer Lake</p> <p>Xavier Junior High, Deer Lake</p> <p>Elwood High School, Deer Lake</p>	<ul style="list-style-type: none"> • No later than the 2007-08 school year, district administrative staff to consult with school councils in the three schools regarding the future of education for students in that area. If, following this consultation, possible change(s) for a school(s) is contemplated, a clear process will be outlined for further consultation with parents and the community.

**Area 18: Pasadena Elementary, Pasadena
Pasadena Academy, Pasadena**

Two schools serve the 515 students of Pasadena. The area is experiencing enrolment declines and is projected to have an enrolment of 405 in the 2010-11 school year.

Pasadena Elementary provides K-6 programming to 240 students in Pasadena. The building is in fair condition and requires roof repairs or replacement, siding replacement, and insulation work. The enrolment is projected to be 222 in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 194 students.

Pasadena Academy provides 7-Level III programming to 275 students in Pasadena. The building is newer than Pasadena Elementary and is in good condition. The enrolment is projected to be 268 in the 2006-07 school year and, by the 2010-11 school year, it is projected to have 211 students.

Recommendations	
<p>Pasadena Elementary, Pasadena</p> <p>Pasadena Academy, Pasadena</p>	<ul style="list-style-type: none"> • No later than the 2006-07 school year, district administrative staff to consult with the school council of Pasadena Elementary regarding the future of education for students in that area. If, following this consultation, possible change(s) for a school(s) is contemplated, a clear process will be outlined for further consultation with parents and the community. • Request capital funding from government for the improvement of facilities for elementary students in Pasadena.

Motion 17: The Board requests funding from government for improvement of facilities for elementary students in Pasadena. The Board further requests the Department of Education undertake a thorough architectural and engineering assessment of Pasadena Elementary.

Area 19 Corner Brook:

*C. C. Loughlin Elementary
 J. J. Curling Elementary
 St. Gerard's Elementary
 Presentation Junior High
 Regina High School*

*Humber Elementary
 Sacred Heart Elementary
 G. C. Rowe Junior High
 Herdman Collegiate*

Nine schools presently serve the 3720 students of Corner Brook, Steady Brook, Massey Drive, Little Rapids, Humber Village and Mount Moriah. There are two systems. One system is comprised of **Herdman Collegiate**, with feeder schools **G. C. Rowe Junior High, Humber Elementary, St. Gerard's Elementary, and Sacred Heart Elementary**. The second system is comprised of **Regina High School**, with feeder schools **Presentation Junior High, J.J. Curling Elementary, and C. C. Loughlin Elementary**, as well as high school students from **St. Peter's Academy**.

The Corner Brook system has a number of older buildings and also has more buildings than needed. The objective of the board is to reduce the number of facilities and, in doing so, to bring each of the remaining facilities up to current educational standards, either through redevelopment of existing buildings or through the construction of new buildings. The long-term objective of the Board in this area, and all other parts of the Western School District, is to achieve state-of-the-art educational facilities for all K-12 students.

Enrolments in the district have decreased 32.2 % since 1996 and the Corner Brook area has experienced similar declines in student population. This steady decline is projected to continue into the future. The table below shows current enrolments at each grade level, as well as birth statistics.

September 2005 Enrolments - Corner Brook Schools														
Grade	Births 2004	Births 2003	Births 2002	Births 2001	K	1	2	3	4	5	6	7	8	9

Description of Buildings

The following gives a brief description of the schools in Corner Brook. Projections are based on current enrolments at the various grade levels, as well as birth statistics for pre-school children. Birth statistics were obtained for the Corner Brook catchment area but are not broken down into present school attendance zones. Therefore, the projections for each school were derived by taking the total projected enrolments based upon birth statistics and allocating numbers to each school based upon historical enrolments. Because of movement within Corner Brook and surrounding area, the actual projections for individual schools may vary but the total projections for all the schools should be accurate. It is important to note as well that projections are based on current zoning.

Regina High School was constructed in 1984 and is in good physical condition. With the addition of instructional areas in the section now known as the monastery, **Regina** will be a larger and educationally enhanced facility with 26 regular classrooms and 19 other instructional spaces. It is fully wheelchair accessible.

Herdman Collegiate is a building that was constructed in 1956 and is in need of major redevelopment. A major redevelopment project has already begun at the **Herdman Collegiate** site and will continue into the fall of 2007. Upon completion of the redevelopment project at the **Herdman Collegiate** site, all the high school students in Corner Brook will be relocated to the redeveloped **Herdman Collegiate** site. At that time, the **Regina High School** will become vacant.

The total high school enrolment in the 2005-06 school year is 1018. The enrolment for the 2006-07 school is projected to be 1014 students, and by the 2010-11 school year, enrolment is projected to be 862 students.

G. C. Rowe Junior High was constructed in 1976 and is in good physical condition. It has 20 regular classrooms and 16 other instructional spaces. It is fully wheelchair accessible. Its student enrolment in the 2005-06 school year is 465. Its projected enrolment for the 2006-07 school year is 417 students and, by the 2010-11 school year, it is projected to have 334 students.

Presentation Junior High was constructed in 1966 with an extension in 1979. It is in poor physical condition and would require major capital funding if it were to remain in use. It has 17 classrooms and 5 other instructional spaces. It is fully wheelchair accessible. Its student enrolment in the 2005-06 school year is 383. Its projected enrolment for the 2006-07 school year is 385 students and, by the 2010-11 school year, it is projected to have 399 students.

Humber Elementary was constructed in 1950 with an extension in 1968. It is an older building but has undergone extensive renovations and redevelopment over the past few years and is in fair physical condition. It has 17 classrooms and 7 other instructional spaces. It is not fully wheelchair accessible and, if it remains in use, would need to be made fully accessible. Its student enrolment in the 2005-06 school year is 374. Its projected enrolment for the 2006-07 school year is 363 students and, by the 2010-11 school year, it is projected to have 313 students. Given its age, as an

alternative to redevelopment, consideration might be given to building a new school to replace Humber Elementary.

St. Gerard's Elementary was constructed in 1975 and is in good physical condition. It is the smallest building in the City with seven classrooms and seven other instructional spaces. It is fully wheelchair accessible. Its student enrolment in the 2005-06 school year is 135. Its projected enrolment for the 2006-07 school year is 120 students and, by the 2010-11 school year, it is projected to have 92 students.

C. C. Loughlin Elementary was constructed in 1965 with an extension in the 1970s. It has undergone renovations and improvements over the past few years and is in good physical condition. It has 26 classrooms and 6 other instructional spaces. It is not fully wheelchair accessible and, if it remains in use, needs to be made fully wheelchair accessible. Its student enrolment in the 2005-06 school year is 525. Its projected enrolment for the 2006-07 school year is 512 students and, by the 2010-11 school year, it is projected to have 531 students.

J. J. Curling Elementary was constructed in 1969. It has had a major exterior upgrade over the past few years and is in good physical condition. It has 15 classrooms and 6 other instructional spaces. It is fully wheelchair accessible. Its student enrolment in the 2005-06 school year is 357. Its projected enrolment for the 2006-07 school year is 352 students and, by the 2010-11 school year, it is projected to have 300 students.

Sacred Heart Elementary was constructed in 1960. It is in poor physical condition and would require major capital funding if it were to remain in use. It has 10 classrooms and 4 other instructional spaces. It is not fully wheelchair accessible and, if it remains in use, needs to be made fully accessible. Its student enrolment in the 2005-06 school year is 254. Its projected enrolment for the 2006-07 school year is 254 students and, by the 2010-11 school year, it is projected to have 238 students.

These descriptions illustrate that many schools in Corner Brook are older and are in need of major redevelopments or replacement if the board is to provide the excellent facilities needed for our students. There is also an acute over capacity in the Corner Brook school system in terms of the number of classrooms and instructional spaces required to provide quality educational opportunities for students.

Projection for Reorganization

While it may be possible to implement some aspects of reorganization earlier, a likely date for major changes in the K-9 system in Corner Brook will be September 2008, following the movement of high school students to the building now known as Herdman Collegiate during the 2007-08 school year. This date of September 2008 may also be contingent on the completion of redevelopment and/or construction in K-9 schools as physical facilities are improved or replaced. For purposes of this report, September 2008 is being treated as a possible target date for K-9 reorganization, and projected enrolment figures presented below are therefore based on the 2008-09 school year.

Table 8: September 2008 Enrolments - Corner Brook Schools									
K	1	2	3	4	5	6	7	8	9
204	205	202	210	206	228	250	255	252	244

Sample Options

Five sample options or possibilities for K-9 school reorganization in Corner Brook are outlined below. The difficulty with presenting options at this stage is that they may be interpreted as the only options, or as preferred options. It must be stressed that these are only sample options and examples of how education could be organized in Corner Brook. There may be other options, and these will emerge in consultation with school councils and the community. Also, within most options you will see that a particular type of school is listed with the same enrolment as others in the same category. It is clear that some variation in two schools of the same type could certainly exist according to zoning and other factors.

Option 1: Two K-4 schools, two 5-9 schools

- K-4 approximately 525 students
- K-4 approximately 525 students
- 5-9 approximately 625 students
- 5-9 approximately 625 students

Option 2: Three K-5 schools, two 6-9 schools

- K-5 approximately 425 students
- K-5 approximately 425 students
- K-5 approximately 425 students
- 6-9 approximately 500 students
- 6-9 approximately 500 students

Option 3: Four K-6 schools and one 7-9 school

- K-6 approximately 400 students
- K-6 approximately 400 students
- K-6 approximately 400 students
- K-6 approximately 400 students
- 7-9 approximately 750 students

Option 4: Two K-3 schools, two 4-6 schools and one 7-9 school

- K-3 approximately 425 students
- K-3 approximately 425 students
- 4-6 approximately 350 students
- 4-6 approximately 350 students
- 7-9 approximately 750 students

Option 5: Two K-3 schools, two 4-7 schools and one 8-9 school

- K-3 approximately 425 students
- K-3 approximately 425 students
- 4-7 approximately 475 students
- 4-7 approximately 475 students
- 8-9 approximately 500 students

These samples obviously do not exhaust the possibilities, and are placed here not only as options but for the purpose of generating further thought regarding configurations. Educational programming would certainly be a major factor in any configuration considered. As can be seen from the five options provided, three or four schools can be closed in Corner Brook. With redevelopment, new construction or replacement, the remaining facilities would need to be brought up to excellent standards.

Recommendations	
<p>Regina High School Herdman Collegiate G.C. Rowe Junior High Presentation Junior High C.C. Loughlin Elementary Humber Elementary J.J. Curling Elementary Sacred Heart Elementary St. Gerard’s Elementary</p>	<ul style="list-style-type: none"> • Request that the Department of Education provide architectural and engineering advice regarding the condition of buildings and feasibility of possible options in the Corner Brook area. • The K-9 reorganization in Corner Brook requires a series of considerations and consultations. It is recommended that this public consultation process begin in September 2006, and that the process should be as follows: <p><u>September - October 2006</u> Consultation by senior administrative staff with school councils and the public regarding the configuration of the K-9 system in Corner Brook. Department of Education and district staff will have prepared information on the condition of buildings and will present viable option(s) for reorganization. Opportunity will be provided for school councils and the general public to present configuration options or to respond to options put forward by the Board or by other parties.</p> <p><u>Late October 2006</u> Recommend to the Board on configuration of the K-9 system in Corner Brook.</p> <p><u>November - December 2006</u> Consultation by the Board with school councils and the public regarding K-9 configuration and possible school closures.</p> • Request major capital funding from government for necessary redevelopments and/or replacement of remaining schools in Corner Brook.

Motion 18: *The Board requests the Department of Education undertake a thorough architectural and engineering assessment into possible redevelopment and/or new construction possibilities for Corner Brook.*

Motion 19: *That the Board and senior administrative staff engage in a consultation process in the Corner Brook area as outlined in the Long-Term Educational Proposal.*

Motion 20: *The Board requests major capital funding from government for necessary redevelopment and/or replacement of remaining schools in Corner Brook.*

Area 20: St. Peter's Academy, Benoit's Cove

St. Peter's Academy provides K-9 programming to 209 students on the south shore of the Bay of Islands from Frenchman's Cove to Benoit's Cove. Grades 10-12 students from this area attend high school in Corner Brook.

St. Peter's Academy is projected to have an enrolment of 199 students in the 2006-07 school year and, in the 2010-11 school year, it is projected to have 170 students. The facility is in good condition. With declining enrolments, the board may wish to consult with the school council of the **St. Peter's Academy** to discuss the future of education in the area.

Exploration of the future of education for students in this area should occur through a consultation process with the school council and the school community. This consultation process should occur at the same time as the Corner Brook process so that any possible relationships between St. Peter's Academy and the configuration of the Corner Brook system can be explored.

Recommendations	
St. Peter's Academy, Benoit's Cove	<ul style="list-style-type: none">• Status Quo• Beginning September 2006, district administrative staff and the Board to consult with the school council and the school community regarding the future of education for students in the area. This consultation will be a part of the process outlined for Corner Brook (see pp. 40-41) and will follow the format and timelines outlined.

Area 21: St. James All-Grade, Lark Harbour

St. James All-Grade provides K-Level III programming to the 141 students to the communities of Lark Harbour and York Harbour on the south shore of the Bay of Islands. It is projected to have an enrolment of 143 in the 2006-07 school year and, in the 2010-11 school year, it is projected to have 123 students. The facility was originally constructed in 1967, with an extension in 1980 and a full redevelopment in 2003. It is in excellent condition and will require no major capital funding in the near future.

Recommendations	
St. James All-Grade, Lark Harbour	<ul style="list-style-type: none">• Status Quo

Area 22: *Templeton Academy, Meadows*

Templeton Academy provides K-Level III programming to 565 students on the north shore of the Bay of Islands. It is projected to have an enrolment of 561 in the 2006-07 school year and, in the 2010-11 school year, it is projected to have 500 students. The facility was constructed in 1984 with and extension and redevelopment in 2004. It is in excellent condition and will require no major capital funding in the near future.

Recommendations	
Templeton Academy, Meadows	• Status Quo

Twelve schools in three separate systems presently serve the 3008 students of Stephenville, Bay St. George and Port au Port Peninsula area.

The first system is comprised of **Appalachia High School**, with feeder schools **Our Lady of Mercy** and **St. Michael’s Elementary**.

The second system is comprised of **Stephenville High School** with feeder schools **Stephenville Middle School**, **Stephenville Elementary**, and **Stephenville Primary**, as well as some students from **St. Thomas Aquinas**.

The third system is comprised of **Piccadilly High School** with feeder schools **Lourdes Elementary**, **Our Lady of the Cape** and some of the students from **St. Thomas Aquinas**.

Enrolments in the district have decreased 32.2 % since 1996. Based upon birth statistics, there will be continued enrolment decline into the future. Given that enrolments at the junior and senior high level are in the range of 250-300 students per grade level and enrolments at the primary level are in the range of 150-190 students per grade level, it is evident that this area of the district will feel the effects of enrolment decline for the next five to six years. Birth statistics for the area indicate that this decline is likely to continue even further than the next five or six years. The two tables following show enrolment trends for the twelve schools in the area from 2005 to 2010.

While statistics are shown together for this entire area, each of the three systems will be looked at separately. While there are possibilities for reorganization within each system, there are also possibilities for some school reorganization across the three systems.

**Area 23: *Appalachia High School, St. George's
Our Lady of Mercy Elementary, St. George's
St. Michael's Elementary, Stephenville Crossing***

Appalachia High School in St. George's provides Grade 9-Level III programming for 263 students in the St. George's-Stephenville Crossing area. It is projected to have an enrolment of 261 in the 2006-07 school year and 227 students in the 2010-11 school year. The building is in excellent physical condition, with an extension and renovations in 2000. St. George's is 12 kilometres from Stephenville Crossing and 27 kilometres from Stephenville.

Our Lady of Mercy in St. George's provides K-8 programming for 188 students in the St. George's area. It is projected to have an enrolment of 175 in the 2006-07 school year and 124 students in the 2010-11 school year. The building is in very good physical condition. **Appalachia High School** and **Our Lady of Mercy** are connected with a corridor between the two buildings. St. George's is 12 kilometres from Stephenville Crossing and 27 kilometres from Stephenville.

St. Michael's Elementary in Stephenville Crossing provides K-8 programming for 248 students in the Stephenville Crossing area. It is projected to have an enrolment of 215 in the 2006-07 school year and 155 students in the 2010-11 school year. The building was constructed in 1976 and is in good physical condition. Stephenville Crossing is 12 kilometres from St. George's and 15 kilometres from Stephenville.

Given that this area is facing declining enrolments, consultation regarding the future of education for students in this area should occur with school councils. While consolidating the entire area into the Stephenville system is not viable nor contemplated, **St. Michael's Elementary** is on the border between the St. George's system and the Stephenville system and this may form the basis for some reorganization discussions.

Recommendations	
<p>Appalachia High School</p> <p>Our Lady of Mercy Elementary</p> <p>St. Michael's Elementary</p>	<ul style="list-style-type: none"> • No later than the 2006-07 school year, district administrative staff to do further study of school reorganization in this system, and to engage in a process for public input on possible reorganizations. If, following this consultation, possible change(s) for a school(s) is contemplated, a clear process will be outlined for further consultation with parents and the community.

Area 24:	Stephenville:	
	<i>Stephenville Primary</i>	<i>Stephenville Elementary</i>
	<i>Stephenville Middle School</i>	<i>Stephenville High School</i>
	<i>St. Thomas Aquinas, Port au Port</i>	<i>Pathfinders/Directions School, Stephenville</i>

Stephenville Primary School in Stephenville provides Grades K-3 programming for 363 students in the Stephenville area. It is projected to have an enrolment of 359 in the 2006-07 school year and 301 students in the 2010-11 school year. The building was constructed in 1993 and is in excellent physical condition.

Stephenville Elementary School in Stephenville provides Grades 4-5 programming for 193 students in the Stephenville area. It is projected to have an enrolment of 177 in the 2006-07 school year and 170 students in the 2010-11 school year. The building was constructed in 1984 and is in very good physical condition.

Stephenville Middle School in Stephenville provides Grades 6-8 programming for 401 students in the Stephenville area. It is projected to have an enrolment of 347 in the 2006-07 school year and 273 students in the 2010-11 school year. The building was constructed in 1972 and is in very good physical condition.

Stephenville High School in Stephenville provides Grades 9-Level III programming for 629 students in the Stephenville area. It is projected to have an enrolment of 635 in the 2006-07 school year and 505 students in the 2010-11 school year. The building was constructed in 1974 and is in very good physical condition.

Pathfinders/Directions School in Stephenville is an alternate school setting providing programming to 25 students in Grade 8 to Level III. It is projected to have an enrolment of 22 students in the 2006-07 school year and 22 students in the 2010-11 school year. The school is located in the **L. S. Eddy Complex** along with a number of other community/educational agencies. The interior of the **L.S. Eddy Building** is in good condition however the exterior building envelope is in poor condition and is in need of extensive repairs and upgrades if it is to remain in operation.

St. Thomas Aquinas in Port au Port provides K-8 programming for 146 students in the Port au Port area. It is projected to have an enrolment of 148 in the 2006-07 school year and 127 students in the 2010-11 school year. The building was constructed in 1960, with extensions and redevelopments in 1970 and 1984. It is in good physical condition. This school is unique in that it is a feeder for two systems. Some students feed into **Piccadilly High School**, while others feed into **Stephenville High School**.

The Stephenville system continues to face declining enrolments and will likely continue to do so. There are two distinct ways to approach reorganization in this area. One way is to look to reorganization within the five schools in Stephenville without looking at neighbouring schools. The second way would be to look at reorganization within the entire area, and look at possibilities of reorganizations that include **St. Thomas Aquinas** and **St. Michael's Elementary**. These reorganization possibilities should be explored through consultations with school councils.

One immediate decision that the board may wish to consider is the closure of the facility known as the **L. S. Eddy Complex** which presently accommodates the **Pathfinders/Directions School** and a number of other community/educational agencies. The Board maintains its commitment to the **Pathfinders/Directions School** and to the various community/educational agencies which the Board partners with and which are housed in the **L. S. Eddy Complex**. In maintaining this commitment, the Board would find appropriate alternate accommodations for these entities.

The **Pathfinders/Directions School** could be relocated to available space within the Stephenville system. The same could apply to the community/educational agencies presently occupying the **L. S. Eddy Complex**. The feasibility of the timing of this closure needs further study and consultations with stakeholders in the area prior to any move.

Recommendations	
<p>Stephenville Primary Stephenville Elementary Stephenville Middle School Stephenville High School Pathfinders/Directions School St. Thomas Aquinas</p>	<ul style="list-style-type: none"> • No later than the 2006-07 school year, district administrative staff to do further study of school reorganization in this area, and to engage in a process for public input on possible reorganizations. If, following this consultation, possible change(s) for a school(s) is contemplated, a clear process will be outlined for further consultation with parents and the community. • Explore with various affected schools and affected agencies the relocation of the Pathfinders/Directions School and other community/educational agencies into appropriate and available space within the Stephenville system.

Motion 21: *The Board expresses its commitment to the concept of the Pathfinders/Directions School and continued cooperative arrangements with other community/educational agencies in the Stephenville area that are presently occupying space at the L.S. Eddy Complex.*

Motion 22: *The Board will explore with various affected schools and affected agencies the relocation of the Pathfinders/Directions School and other community/educational agencies into appropriate and available space within the Stephenville system.*

**Area 25: Piccadilly High School, Piccadilly
 Lourdes Elementary, Lourdes
 Our Lady of the Cape, DeGrau**

Piccadilly High School in Piccadilly provides Grades 9-Level III programming for 240 students on the Port au Port Peninsula area. These students come from Lourdes Elementary, Our Lady of the Cape School, and St. Thomas Aquinas (see pp. 47-48). The school is projected to have an enrolment of 242 in the 2006-07 school year and 167 students in the 2010-11 school year. The building was constructed in 1978 with extensions and redevelopments in 1998. It is in very good physical condition.

Lourdes Elementary in Lourdes provides Grades K-8 programming for 251 students in the Lourdes and part of the Port au Port Peninsula area. It is projected to have an enrolment of 245 in the 2006-07 school year and 205 students in the 2010-11 school year. The building was constructed in 1974 with extensions and redevelopments in 1984 and 1999. It is in very good physical condition.

Our Lady of the Cape School in DeGrau provides Grades K-8 programming for 64 students from part of the Port au Port Peninsula area. It is projected to have an enrolment of 59 in the 2006-07 school year and 51 students in the 2010-11 school year. The building is in good physical condition.

With declining enrolments also affecting this area, consideration of reorganization should occur. While there are different options that can be explored, one such option would be to move to a single K-Level III school to serve all the students on the Port au Port Peninsula. This could be accomplished through extensions and redevelopment at either **Lourdes Elementary** or **Piccadilly High School**, and the closure of **Our Lady of the Cape** and either **Piccadilly High School** or **Lourdes Elementary**. To further analyze this and other possibilities, consultations with the school councils in the area should occur.

Recommendations	
<p>Piccadilly High School, Piccadilly Lourdes Elementary, Lourdes Our Lady of the Cape, DeGrau</p>	<ul style="list-style-type: none"> • No later than the 2007-08 school year, district administrative staff to consult with the school councils regarding the future of education for students in the area. If, following this consultation, possible change(s) for a school(s) is contemplated, a clear process will be outlined for further consultation with parents and the community. • Request funding for reconfiguration and redevelopments in the area.

Motion 23: *The Western School District will indicate to government its intention to explore educational options in the Piccadilly-Lourdes-DeGrau region, and request government to reserve long-term capital funds for possible capital expenditure in this region.*

**Area 26: E. A. Butler, McKays
Cassidy Memorial, St. Fintan's**

E. A. Butler School and **Cassidy Memorial School** provide K-Level III programming to the 166 students in the area from Highlands to Fischells. It is projected to have an enrolment of 160 in the 2006-07 school year and an enrolment of 124 students in the 2010-11 school year. Construction is underway at **E. A. Butler School** to redevelop it into a K-Level III facility. Upon completion of that project, **Cassidy Memorial School** will close and students will be relocated to **E. A. Butler School**. E. A. Butler, at the end of the construction project, will be in excellent physical condition.

Recommendations	
E. A. Butler School, McKays	<ul style="list-style-type: none"> • Status Quo
Cassidy Memorial School, St. Fintan's	<ul style="list-style-type: none"> • Closure upon completion of the construction project at E. A. Butler School, students relocated to E. A. Butler School. <p><i>Note: The appropriate Board motion for this move has already been made.</i></p>

Area 27: Belanger Memorial School, Upper Ferry

Belanger Memorial School in **Upper Ferry** provides K-Level III programming to the 221 students in the Codroy Valley area. It is projected to have an enrolment of 214 in the 2006-07 school year and an enrolment of 170 students in the 2010-11 school year. **Belanger Memorial School** is in very good physical condition.

Recommendations

Area 28: *St. James Elementary, Port aux Basques*
 St. James Regional High School, Port aux Basques
 LeGallais Memorial School, Isle aux Morts

St. James Elementary in Port aux Basques provides K-6 programming to the 320 students in the Port aux Basques area. It is projected to have an enrolment of 322 in the 2006-07 school year, and an enrolment of 310 students in the 2010-11 school year, or 359 if **LeGallais Memorial School** is closed. The building is in very good physical condition.

St. James Regional High School in Port aux Basques provides Grades 7-Level III programming to the 399 students in the Port aux Basques area. It is projected to have an enrolment of 388 in the 2006-07 school year and an enrolment of 293 students in the 2010-11 school year, or 312 if **LeGallais Memorial School** is closed. **St. James Regional High School** recently underwent a redevelopment in preparation for accommodation of the junior high students in the area and is in very good physical condition.

LeGallais Memorial School in Isle aux Morts provides Grades K-9 programming to 72 students in Isle aux Morts. It is projected to have an enrolment of 71 in the 2006-07 school year and an enrolment of 68 students in the 2010-11 school year. It was constructed in 1987 and is in very good physical condition. Isle aux Morts is 23 kilometres from Port aux Basques and high school students from that community are presently bused to Port aux Basques.

LeGallais Memorial School, Isle aux Morts	<ul style="list-style-type: none"> • Prior to June 23, 2006, district administrative staff to consult with the school council of LeGallais Memorial regarding the future of education for students in the area. If, following this consultation, possible change for the school is contemplated, a clear process will be outlined for further consultation with parents and the community.

**Area 29: Grandy’s River Collegiate, Burnt Islands
St. Michael’s Elementary, Rose Blanche**

Grandy’s River Collegiate in Burnt Islands provides Grades K-Level III programming to the 168 students in Burnt Islands and Grades 7-Level III programming to students from Rose Blanche, Harbour Le Cou and Diamond Cove. It is projected to have an enrolment of 155 in the 2006-07 school year, or 176 if **St. Michael’s Elementary** is closed, and an enrolment of 98 students in the 2010-11 school year, or 116 if **St. Michael’s Elementary is closed**. The building was constructed in 1978, with extensions in 1998 and 2002 and is in good physical condition.

St. Michael’s Elementary in Rose Blanche provides Grades K-6 programming to 21 students in Rose Blanche, Harbour Le Cou and Diamond Cove. It is projected to have an enrolment of 21 in the 2006-07 school year and an enrolment of 18 students in the 2010-11 school year. The building is not in good physical shape and requires extensive exterior and interior upgrading. Rose Blanche is 17 kilometres from **Grandy’s River Collegiate** and Grades 7-Level III students from that community are presently bused to that school.

Recommendations	
Grandy’s River Collegiate, Burnt Islands	<ul style="list-style-type: none"> • Status Quo
St. Michael’s Elementary, Rose Blanche	<ul style="list-style-type: none"> • Possible closure effective June 2006, students relocated to Grandy’s River Collegiate.

Motion 24: The Board hereby gives notice of motion for possible closure of St. Michael’s Elementary, Rose Blanche, effective June 2006.

Area 30: Douglas Academy, LaPoile

Douglas Academy in LaPoile provides K-9 programming to eight students in LaPoile. It is projected to have an enrolment of eight students in the 2006-07 school year and an enrolment of nine students in the 2010-11 school year. High school students from that community attend other high schools on bursary programs. LaPoile is an isolated community inaccessible by road. The building is in need of extensive repairs and renovations.

Recommendations	
Douglas Academy, LaPoile	• Status Quo

Motion 25: *The Board requests funding from government to implement capital improvements of Douglas Academy in LaPoile.*

Area 31: Grand Bruit All-Grade, Grand Bruit

Grand Bruit All-Grade in Grand Bruit provides K-9 programming to two students in that community. Grand Bruit is an isolated community inaccessible by road. The school is projected to have an enrolment of two students in the 2006-07 school year and, following that year, there are no students projected. High school students from that community attend other high schools on bursary programs. At the end of the 2006-07 school year, the two students will leave Grand Bruit All-Grade for their high school program utilizing the bursary program, leaving the school with no students. To formalize the official school closure process, the Board will issue a notice of motion, some time during the 2006-07 school year, for possible closure of Grand Bruit All-Grade, effective at the end of the 2006-07 school year.

Recommendations	
Grand Bruit All-Grade, Grand Bruit	<ul style="list-style-type: none">• Status Quo

Area 32: *Burgeo Academy, Burgeo*

Burgeo Academy in **Burgeo** provides K-Level III programming to 168 students in that community. It is projected to have an enrolment of 170 students in the 2006-07 school year and an enrolment of 133 students in the 2010-11 school year. The school was newly constructed in 2003 and is in excellent condition.

Recommendations	
Burgeo Academy, Burgeo	<ul style="list-style-type: none">• Status Quo

Area 33: St. Boniface All-Grade, Ramea

St. Boniface All-Grade in **Ramea** provides K-Level III programming to 78 students in that community. It is projected to have an enrolment of 76 students in the 2006-07 school year and an enrolment of 62 students in the 2010-11 school year. Ramea is an isolated community inaccessible by road. The school was constructed in 1997 and is in excellent condition.

Recommendations	
St. Boniface All-Grade, Ramea	<ul style="list-style-type: none">• Status Quo

Area 34: All Saints All-Grade, Grey River

All Saints All-Grade in Grey River provides K-Level III programming to 16 students in that community. It is projected to have an enrolment of 16 students in the 2006-07 school year and an enrolment of 11 students in the 2010-11 school year. Grey River is an isolated community inaccessible by road. The building is in need of exterior repairs and upgrading and funding has been requested from government for this work. The teacher duplex is also in need of upgrading.

Recommendations	
All Saints All-Grade, Grey River	<ul style="list-style-type: none">• Status Quo

Area 35: St. Simon and St. Jude, Francois

St. Simon and St. Jude in **Francois** provides K-Level III programming to 25 students in that community. It is projected to have an enrolment of 28 students in the 2006-07 school year and an enrolment of 24 students in the 2010-11 school year. Francois is an isolated community inaccessible by road. The building is in good condition but the teacher duplex requires upgrades.

Recommendations	
St. Simon and St. Jude, Francois	<ul style="list-style-type: none">• Status Quo

Summary of Motions

- Motion 1:** *The Board hereby gives notice of motion for possible closure of Pinsent's Arm School effective June 30, 2006.*
- Motion 2:** *The Board requests funding from government for the construction of a new K-Level III school in Port Hope Simpson.*
- Motion 3:** *The Board hereby gives notice of motion for possible closure of St. James School, Lodge Bay, effective June 30, 2006.*
- Motion 4:** *The Board hereby gives notice of motion for possible closure of Our Lady of Labrador School, West Ste. Modeste, effective upon the establishment of a new K-Level III school in L'Anse au Loup.*
- Motion 5:** *The Board hereby gives notice of motion for possible closure of St. Paul's Elementary, L'Anse au Loup, effective upon the establishment of a new K-Level III school in L'Anse au Loup.*
- Motion 6:** *The Board hereby gives notice of motion for possible closure of Mountain Feild Academy, Forteau, effective upon the establishment of a new K-Level III school in L'Anse au Loup.*
- Motion 7:** *The Board requests funding from government for the redevelopment of Harriot Curtis Collegiate.*
- Motion 8:** *The Board further requests the Department of Education to conduct a thorough architectural and engineering assessment, the results of which would determine whether other options, including new construction, should be considered.*
- Motion 9:** *The Board requests funding from government for the redevelopment of Cloud River Academy, pending the results of board processes including consultation with the school communities.*
- Motion 10:** *The Board hereby gives notice of motion for possible closure of Straits Elementary, Flower's Cove, pending the interior redevelopment and provision of appropriate space at Canon Richards High School.*
- Motion 11:** *The Board requests funding from government for the construction of a new K-Level III school in Port Saunders.*
- Motion 12:** *The Board hereby gives notice of motion for possible closure of Torrent River Academy, Hawke's Bay, effective upon the establishment of a K-Level III school in Port Saunders.*

- Motion 13:** *The Board hereby gives notice of motion for possible closure of St. Theresa's Elementary, Port aux Choix, effective upon the establishment of a K-Level III school in Port Saunders.*
- Motion 14:** *The Board hereby gives notice of motion for possible closure of Roncalli High School, Port Saunders, effective upon the establishment of a K-Level III school in Port Saunders.*
- Motion 15:** *The Western School District will indicate to government its intention to explore educational options in the Bellburns to St. Paul's region, and request government to reserve long-term capital funds for possible capital expenditure in this region.*
- Motion 16:** *The Board requests funding from government for school construction or redevelopment in the Bonne Bay South area. The Board further requests the Department of Education undertake a thorough architectural and engineering assessment of the various options.*
- Motion 17:** *The Board requests funding from government for improvement of facilities for elementary students in Pasadena. The Board further requests the Department of Education undertake a thorough architectural and engineering assessment of Pasadena Elementary.*
- Motion 18:** *The Board requests the Department of Education undertake a thorough architectural and engineering assessment into possible redevelopment and/or new construction possibilities for Corner Brook.*
- Motion 19:** *That the Board and senior administrative staff engage in a consultation process in the Corner Brook area as outlined in the Long-Term Educational Proposal.*
- Motion 20:** *The Board requests major capital funding from government for necessary redevelopment and/or replacement of remaining schools in Corner Brook.*
- Motion 21:** *The Board expresses its commitment to the concept of the Pathfinders/Directions School and continued cooperative arrangements with other community/educational agencies in the Stephenville area that are presently occupying space at the L.S. Eddy Complex.*
- Motion 22:** *The Board will explore with various affected schools and affected agencies the relocation of the Pathfinders/Directions School and other community/educational agencies into appropriate and available space within the Stephenville system.*
- Motion 23:** *The Western School District will indicate to government its intention to explore educational options in the Piccadilly-Lourdes-DeGrau region, and request government to reserve long-term capital funds for possible capital expenditure in this region.*

Motion 24: *The Board hereby gives notice of motion for possible closure of St. Michael's Elementary, Rose Blanche, effective June 2006.*

Motion 25: *The Board requests funding from government to implement capital improvements of Douglas Academy in LaPoile.*

Templeton Academy, Meadows

School Type: K-12

Construction date(s): Constructed in 1984, with an extension in 2004.

Size: 54,637 square feet

Construction materials: The building is constructed of masonry exterior and interior. The roof is a flat steel deck with tar and gravel covering. The flooring is tile, and the school is fully wheelchair accessible. The building is electrically heated and is connected to town water and sewer services.

Land title: The school board has title to the school site.

Physical Condition: Excellent

Major Capital Needs: None

Rooms: 26 Classrooms
4 Special Services rooms
Home economics room
Cafeteria
2 computer rooms
Fabrication room
Staff room
Challenging needs suite
Art room
Gymnasium with stage
2 laboratories
Library
Administrative offices

Catchment Area: The school serves the K-12 students from the communities of Cox's Cove, McIvers, Meadows, Summerside, Irishtown, and Hughes Brook. Being a K-12 school, it does not feed into any other school.

Nearest School (by road): Meadows is 26 kilometres from a K-12 system in Corner Brook.

¹ Students who previously attended Senior High School for at least three years.

² Reflects policy changes in special education, 1989-90 to 1997-98. Students receiving special education services and not instructed in regular classrooms (see tables 24-27 for the total number of students receiving special education services). Since 1998-99 all students receiving special education services have been reported in their age appropriate grade or the highest grade in the school.

³ Commercial program. This program was phased out in 1983-84.
